

JOURNAL OF
AVIAN BIOLOGY

VOLUME 46 NO. 6 NOVEMBER 2015

Contents

Editor's Choice

- Common loon parents defend chicks according to both value and vulnerability 551 Gabriella Jukkala and Walter Piper
 Impacts of nest predators and weather on reproductive success and population limitation in a long-distance migratory songbird 559 Thomas W. Sherry, Scott Wilson, Sarah Hunter and Richard T. Holmes

Research

- No change in common cuckoo *Cuculus canorus* parasitism and great reed warblers' *Acrocephalus arundinaceus* egg rejection after seven decades 570 Anikó Zölei, Miklós Bán and Csaba Moskát
 Does fragmentation of wetlands affect gene flow in sympatric *Acrocephalus* warblers with different migration strategies? 577 Francesco Ceresa, Eduardo J. Belda, Laura Kvist, Hamid Rguibi-Idrissi and Juan S. Monrós
 The effect of kleptoparasite and host numbers on the risk of food-stealing in an avian assemblage 589 Kevin A. Wood, Richard A. Stillman and John D. Goss-Custard
 An evaluation of different methods for assessing eggshell pigmentation and pigment concentration using great tit eggs 597 Michèle Wegmann, Armelle Vallat-Michel and Heinz Richner
 Synchronization of laying by great spotted cuckoos and recognition ability of magpies 608 Manuel Soler, Tomás Pérez-Contreras and Juan José Soler

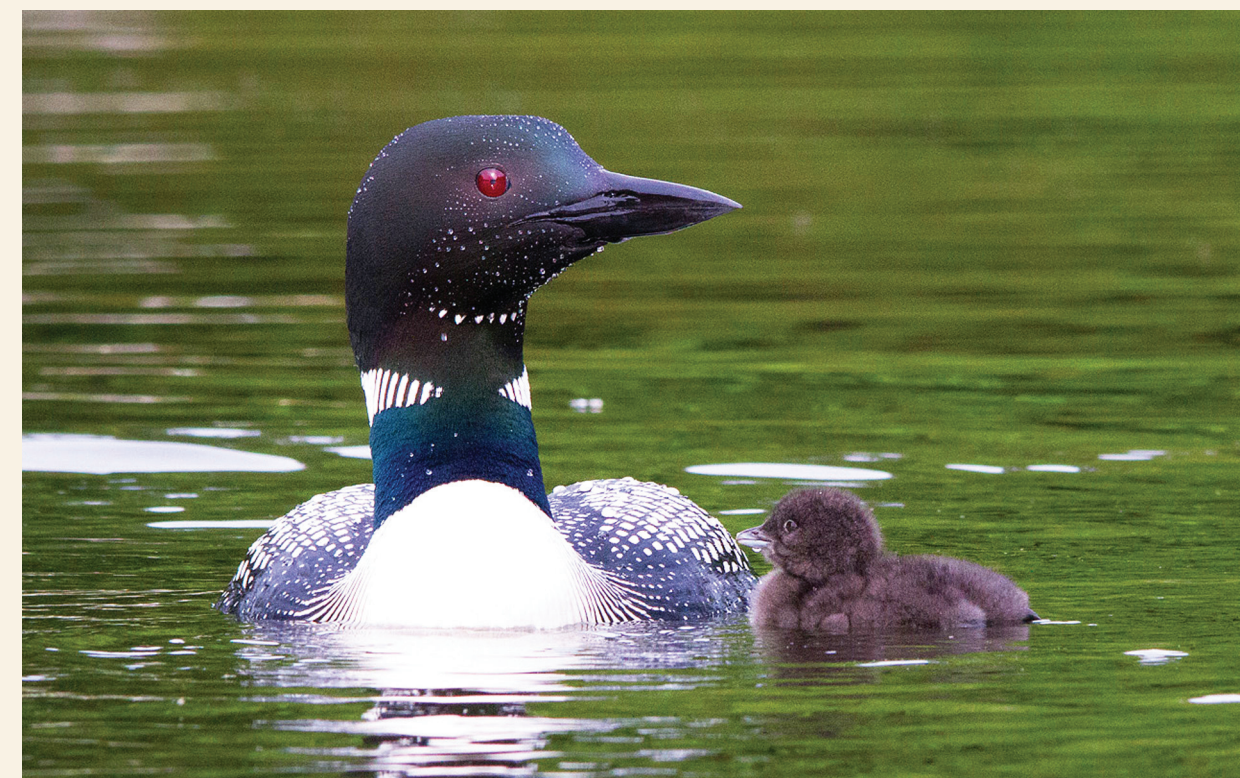

Articles

- Faster spring migration in northern wheatears is not explained by an endogenous seasonal difference in refueling rates 616 Cas Eikenaar, Arseny Tsvey and Heiko Schmaljohann
 Fine-scale habitat use during the non-breeding season suggests that winter habitat does not limit breeding populations of a declining long-distance Palearctic migrant 622 Emma Blackburn and Will Cresswell

Communications

- Individual migration patterns of Eurasian golden plovers *Pluvialis apricaria* breeding in Swedish Lapland; examples of cold spell-induced winter movements 634 Paula Machín, Juan Fernández-Elípe, Manuel Flores, James W. Fox, Jose I. Aguirre and Raymond H. G. Klaassen
 Novel insights into relationships between egg corticosterone and timing of breeding revealed by LC-MS/MS 643 Tom Rosendahl Larsen, Graham D. Fairhurst, Siegrid De Baere, Siska Croubels, Wendt Müller, Liesbeth De Neve and Luc Lens
 Revealing unexpected uses of space by wintering *Aquila pomarina*: how does satellite telemetry identify behaviour at different scales? 648 Bernd-Ulrich Meyburg, Stephanie Mendelsohn, John Mendelsohn and Helen Margaret de Klerk
 Space-time tradeoffs in the development of precipitation-based isoscape models for determining migratory origin 658 Hannah B. Vander Zanden, Michael B. Wunder, Keith A. Hobson, Steven L. Van Wilgenburg, Leonard I. Wassenaar, Jeffrey M. Welker and Gabriel J. Bowen

JOURNAL OF
AVIAN BIOLOGY
 VOLUME 46 **6** NOVEMBER 2015

JOURNAL OF
AVIAN BIOLOGY

VOLUME 1-24 PUBLISHED AS ORNIS SCANDINAVICA

JOURNAL OF AVIAN BIOLOGY is issued bimonthly on behalf of the Nordic Society Oikos. The journal presents original work on all aspects of ornithology with emphasis on ecological, behavioural and evolutionary aspects. www.AvianBiology.org

JOURNAL OF AVIAN BIOLOGY is published in close cooperation with the journals *Ecography*, *Oikos*, *Hereditas*, *Nordic Journal of Botany* and the monograph series *Ecological Bulletins*.

Editors-in-Chief

Drs Thomas Ålerstam and Jan-Åke Nilsson, Lund University, Lund, Sweden.

Subject Editors

Drs Peter Arcese, University of British Columbia, Vancouver, Canada. Staffan Bensch, Lund University, Lund, Sweden. Wesley M. Hochachka, Cornell University, Ithaca, USA. Wolfgang Goyman, MPI für Ornithologie, Seewiesen, Germany. Simon C. Griffith, Macquarie University, Sydney, Australia. Darren Irwin, University of British Columbia, Canada. Erkki Korpimäki, University of Turku, Turku, Finland. Toni Laaksonen, University of Turku, Turku, Finland. Ruedi Nager, University of Glasgow, Glasgow, UK. Julio M. Neto, CIBIO, University of Porto, Portugal, and Department of biology, University of Lund, Sweden. Javier Pérez-Tris, University of Madrid, Madrid, Spain. Martin Päckert, Senckenberg Natural History Collections, Dresden, Germany. Alexandre Roulin, University of Lausanne, Lausanne, Switzerland. Jan van Gils, Royal Netherlands Institute for Sea Research, Texel, Netherlands. Simon Verhulst, University of Groningen, Groningen, The Netherlands. Yutaka Watanuki, Hokkaido University, Hakodate, Japan. Henri Weimerskirch, Centre National de la Recherche Scientifique, Villiers en Bois, France. Ron Ydenberg, Simon Fraser University, Burnaby, Canada.

Managing Editor

Dr Johan Nilsson, Ecology Building, SE-223 62 Lund, Sweden.

Publication Board

Jacobus Boomsma, Copenhagen, Marianne Fred, Åbo Akademi University, Finland, Gísli Már Gíslason, Reykjavík,

Erkki Korpimäki, Turku, Gunilla Rosenquist, Trondheim, Birgitta Tullberg, Stockholm and Linus Svensson, Lund.

The scope of Journal of Avian Biology

Journal of Avian Biology publishes empirical and theoretical research in all areas of ornithology, with an emphasis on ecology, behaviour and evolutionary biology. Preferably papers should test hypotheses or explore new ground. Purely descriptive studies are accepted only when they contain important information that gives rise to new questions or opens up new grounds. Papers are published under five main headings:

Point-of-View are short papers (max 5 printed pages; about 4 500 words) that focus on selected topics, and are intended for discussion and comments on papers concerning recent issues. Authors are encouraged to be provocative and argue their own views on controversial issues. Point-of-View is also open for communication of new ideas and re-evaluations. Readers and authors are welcome to suggest suitable topics and/or potential authors at jab@oikosoffice.lu.se. An abstract is not required.

Reviews provide an opportunity to summarize existing knowledge within ornithological research, especially within areas where rapid and significant advances are being made. An abstract is required.

Letters are short papers (max 5 printed pp; about 5 500 words), ideally presenting new and exciting results. Letters will be given priority, whenever possible, in the publication queue. Contributions should be as concise as possible. An abstract is required.

Articles are normal full length papers that make up the main part of each issue. Articles focus on empirical and theoretical research in all areas of ornithology, with the emphasis being on ecology, behaviour and evolution. An abstract is required.

Communications are short contributions (max 5 printed pages; about 4 500 words) that represent biologically interesting findings within ornithology, and notes on methodology and equipment. An abstract is required.

Guide to authors

General

Authors submitting a manuscript do so on the understanding that the work has not been published before, is not being simultaneously considered elsewhere and that the manuscript has been read and approved by all its authors. Manuscripts that are judged to be of potential interest to the journal's readership are sent out to at least two external reviewers. Authors will normally be notified between 60–90 days from receipt, whether the manuscript is accepted, provisionally accepted (i.e. requiring revision), or rejected. No reprints will be supplied. Instead, authors will receive a locked pdf-file to use at their discretion. There are no page charges.

Copyright

Once a manuscript has been accepted for publication, exclusive copyright is shared between the author and the journal, which means that the work must not be published elsewhere in any language without the written consent of both the author and the journal. Articles are protected by copyright. This includes translation rights and the right to reproduce and distribute all of the articles printed in the journal. No material published in the journal may be stored on microfilm, video cassettes or in electronic data bases and the like without prior written permission from the journal.

Manuscript submission

You are most welcome to submit your manuscript electronically at: www.manuscriptcentral.com/javbio

The manuscript should be written in English, either British or American English, as long as it is used consistently. Figures can be in the form of copies (should be embedded in the ms-file), but in case of acceptance we will require high resolution figures (≥ 300 dpi), to be sent to our typesetters. The manuscript should contain a brief abstract (but please see above under headings) containing information on, e.g. study topic, methods, results and discussion, and should be useful for indexing and information retrieval. The address(es) of the author(s) should be given on the manuscript (including the e-mail-address of the corresponding author), and should be kept at a minimum.

Manuscript format

The format of the manuscript should always be according to our style, please see a recent issue of JAB. The text should be on A4 paper size (in WORD format, or PDF format; including page and line numbers), double-spaced with normal margins. If and when a manuscript has been accepted, we require a WORD file for copyediting.

Tables

Tables should have a legend connected to them (preferably above the table), and the legend should be intelligible without recourse to the text.

Illustrations

Copies of all illustrations, whether diagrams, graphs, maps, or photographs, should be included with each manuscript. The legends for figures should be written on separate sheets. Plan your figures (e.g., labels on the axes of graphs – please no bold entries), and please use Garamond font. Colour figures/plates may be included at the authors expense (currently 375 Euros/article). Please contact the Managing Editor (jab@oikosoffice.lu.se) if you need details.

References

References in the reference list; please use the abbreviations for journal titles used in Biological Abstracts. For other details relating to references, see a recent issue of the journal.

In the list of references, the following usage should be used:

Journal: Moore, F. R. 1987. Sunset and the orientation behavior of migrating birds. – *Biol. Rev.* 62: 65–86.

Book: Andersson, M. 1994. Sexual selection. – Princeton Univ. Press.

Chapter: Lessells, C. M. 1991. The evolution of life histories. – In: Krebs, J. R. and Davies, N. B. (eds), *Behavioural ecology: an evolutionary approach*. Blackwell Scientific Publ., pp. 32–68.

Authors are strongly recommended to follow the guidelines given in:

O'Connor, M. 1991. *Writing successfully in science*. – Harper and Collins Academic, London.

and to examine recent issues of the JAB for style. Manuscripts that do not conform to our requirements will be returned for revision.

Subscriptions:

For ordering information, claims and any enquiry concerning your journal subscription please contact your nearest office: UK: E-mail: customerservices@blackwellpublishing.com; Tel: +44(0) 1865 778315; Fax: +44(0) 1865 471775. USA: E-mail: customer services@blackwellpublishing.com; Tel: +1 781 388 8599 or +1 800 835 6770 (Toll free in USA and Canada); Fax: +1 781 388 8232 or +44(0) 1865 471775.
