Table A5. Explanatory variables for color variation used for the mixed effects models between east and west of the Isthmus of Tehuantepec and east-west Mexico.

Response variable	Explanatory variables	Description	Effect
Coloration	Genetic difference	Color variation is explained by genetic differences between groups	Fixed
	Environmental differences	Color variation is explained by environmental differences between groups	Fixed
	Genetic and environment	Color variation is explained by both the environmental and the genetic differences between groups	Fixed
	Interaction of genetic and environment	Color variation is explained by the interaction of environmental and genetic differences between groups	Fixed
	East-West Isthmus	Color variation is explained by geographic grouping	Random
	East-West Mexico	Color variation is explained by geographic grouping	Random
